# Pressure Relief Abductor

### SAFETY FEATURES:

**Heel** → Heel-A-Hip 'offloads' heels and ELIMINATES heel pressure.

**Sacrum** → UNIQUE rocker bottom easily **tips pelvis** for 'pressure redistribution', PREVENTS arterial occlusion and inadvertent over tightening of ankle straps.

### COMFORT:

Low density foam avoids ankle pressure points.

Distal foam supports gently cradle the lower extremities and prevent external rotation.

Ease of turning 'pelvic tilt via 'Rocker Bottom'

### COST:

Heel-A-Hip replaces the need for heel boots and bulky 'combination of products'

One product replaces 3

Heel-A-Hip **standardizes care** post hip surgery.
