

Showereez®

Limb Protectors

The Showering Accessory that is
Simple, Effective, Affordable
& **100% Latex-Free.**

Double Feature

- ① A **non-latex elastic band** is encased at the top edge of each protector to **prevent initial water entry** during a showering procedure.
- ② A second elastic band is positioned a short distance from the first band, creating an **inner seal** and a small **“ledge”** designed to catch any trickles that may pass through the upper band.

This patented **double-band design** forms a simple yet **highly effective barrier** that helps protect casts, wounds, dressings, IVs, or PICC lines from **moisture** and other **contaminants** during showering.
